SUMMARY

Computer Science undergraduate at Asia Pacific University (APU) with six shipped, open-source projects, five built in Flutter. Comfortable taking an idea from a blank repository to a working cross-platform app on iOS and Android, with hands-on experience in real-time data sync, authentication, and clean UI. Interested in mobile development and backend architecture. Open to internships in Kuala Lumpur.

EDUCATION

BSc (Hons) Computer Science — specializing in Data Analytics

2025 – 2027 (expected)

Asia Pacific University of Technology & Innovation (APU), Kuala Lumpur

Relevant coursework: Algorithms, Data Structures, Software Engineering.

TECHNICAL SKILLS

- **Languages:** Dart, TypeScript, Python, C++, Java, HTML/CSS
- **Frameworks & Tools:** Flutter, Node.js, Firebase (Auth, Firestore, Storage), Figma, Git & GitHub, Local LLM
- **Focus Areas:** Cross-platform mobile development, real-time data sync, UI/UX

PROJECTS

QBooking - Flutter · with AltaDevs

[qbooking.app](#) →

Native iOS/Android companion app for the QBooking web portal. Built persistent authentication, role-based landing screens, and a mobile-friendly view of the portal, as a collaboration with the AltaDevs team.

ListyApp - Flutter · Dart · Firebase

[Source](#) →

Real-time collaborative list app. Users create shared lists, assign items to friends, and watch updates sync live across devices as items are ticked off.

SmartDesk - Flutter · Dart

[Source](#) →

Multi-role fault-ticketing system across four user roles, featuring simulated AI triage, priority scoring, smart routing to technicians, SLA tracking, and recurring-fault analytics.

CocoStudy - TypeScript · Node.js

[cocostudy.space](#) →

Study tool that turns lecture recordings into revision material — generating summaries, quizzes, and flashcards from a single recording.

WeatherSphere - Flutter · Dart · Figma

[Source](#) →

Cross-platform weather app: current conditions, a 7-day forecast, and a pin-drop map to check the weather anywhere. One codebase for both iOS and Android.

LifeSkills - Flutter · Dart · Firebase

[Source](#) →

Habit-building fitness app centered on streaks. Daily check-ins, mood logging, an activity explorer, and editable profiles, backed by Firebase Auth and Firestore.

ADDITIONAL

- **Languages:** English (fluent), Arabic (native).
- **GitHub:** 10 repositories, GitHub Developer Program member.
- **Skills:** Photography, Videography, Photo and video editing.
