

ZAKI AHMAD MOHAMMAD NAZZAL

Software Engineer | Flutter, Full-Stack & Database Development

+60 11 2892 4379 | zakinazal112@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate and self-directed full-stack/mobile developer experienced in Flutter/Dart, Firebase, TypeScript/Node.js, ASP.NET Core MVC, and MySQL, including designing relational schemas and writing SQL queries for search, filtering, and reporting. Comfortable owning a feature end-to-end with minimal oversight and communicating progress clearly across distributed teams proven by independently founding and building SCORVYN, a streetwear brand with a live custom-built e-commerce storefront, alongside coursework and group software projects. Seeking a Software Engineer role.

EDUCATION

B.Sc. (Hons) Computer Science — Asia Pacific University of Technology & Innovation (APU), Kuala Lumpur Expected 2027

CGPA: 3.00/4.00 | **Relevant coursework:** Data Structures & Algorithms, Mobile App Engineering, Web Applications Development, OOP, Database Systems, Research Methods.

PROJECTS

SmartDesk — AI-Powered IT Helpdesk App | Flutter · Dart · Firebase · Gemini API [[GitHub](#)] 2025

- Built ticket creation, assignment, and resolution flows for a four-role (user, agent, vendor, admin) helpdesk platform in a shared Flutter codebase as part of a distributed team, coordinating over Git branching and pull requests.
- Integrated an AI assistant via the Gemini API to auto-suggest ticket categories and draft first-response replies, reducing manual triage effort.
- Used Firebase Authentication and Cloud Firestore for role-based access control and real-time status sync across all four roles.

CocoStudy — AI Study Platform | TypeScript · Node.js · Gemini API [[GitHub](#)] 2025

- Developed a study web app that summarizes lecture notes and video transcripts and auto-generates quizzes and flashcards from them.
- Built the backend in TypeScript and Node.js, orchestrating Gemini API calls for summarization and question generation.
- Structured the API around clean, reusable endpoints for summaries, quizzes, and flashcards.

APU SkillHub — Course & Tutor Marketplace | ASP.NET Core MVC · C# · MySQL [[GitHub](#)] 2025

- Built the Home/Navigation, Course Browsing & Search, and Course Details modules for a group web platform connecting students with tutors.
- Designed the relational MySQL schema and wrote server-side SQL queries for search, filtering, and joins across course and tutor listings, with tutor profiles rendered from the database.
- Followed the MVC pattern for clean separation of concerns and collaborated via Git branching and pull requests.

SCORVYN — Streetwear Brand (Founder) | HTML · CSS · JavaScript [[scorvyn.shop](#)] 2025–Present

- Independently founded and built a direct-to-consumer streetwear brand end-to-end, from visual identity to a live e-commerce site hand-coded from scratch.
- Built the storefront in HTML/CSS/JavaScript (no site builder) with a brutalist-minimal design system, and led launch marketing, demonstrating self-directed ownership from concept to shipped product.

WeatherSphere — Weather App | Flutter · Dart · Figma [[GitHub](#)] 2025

- Designed the full UI in Figma before development, then built a responsive Flutter app with live conditions, 7-day forecasts, and location-based info.
- Optimized layouts to render cleanly across both phone and tablet form factors.

LifeSkills — Habit Tracker | Flutter · Dart · Firebase [[GitHub](#)] 2025

- Created a habit-tracking app with daily streaks, mood check-ins, an activity explorer, and editable profiles.
- Backed it with Firebase Auth, Firestore, and Storage for cross-device login, syncing, and persistent data.

TECHNICAL SKILLS

Languages: Dart, TypeScript, JavaScript, Python, C#, C++, Java, SQL, HTML, CSS

Frameworks & Backend: Flutter (mobile & web), Node.js, ASP.NET Core MVC, Firebase, REST APIs, Gemini API

Tools: Git / GitHub, VS Code, Android Studio, Figma

Concepts: Data structures & algorithms, OOP, MVC architecture, responsive UI design

Soft Skills: Remote collaboration, written communication, self-direction, ownership, time management, adaptability, attention to detail

Spoken Languages: English (Fluent), Arabic (Native)
